

IDEAS

① Shot chart

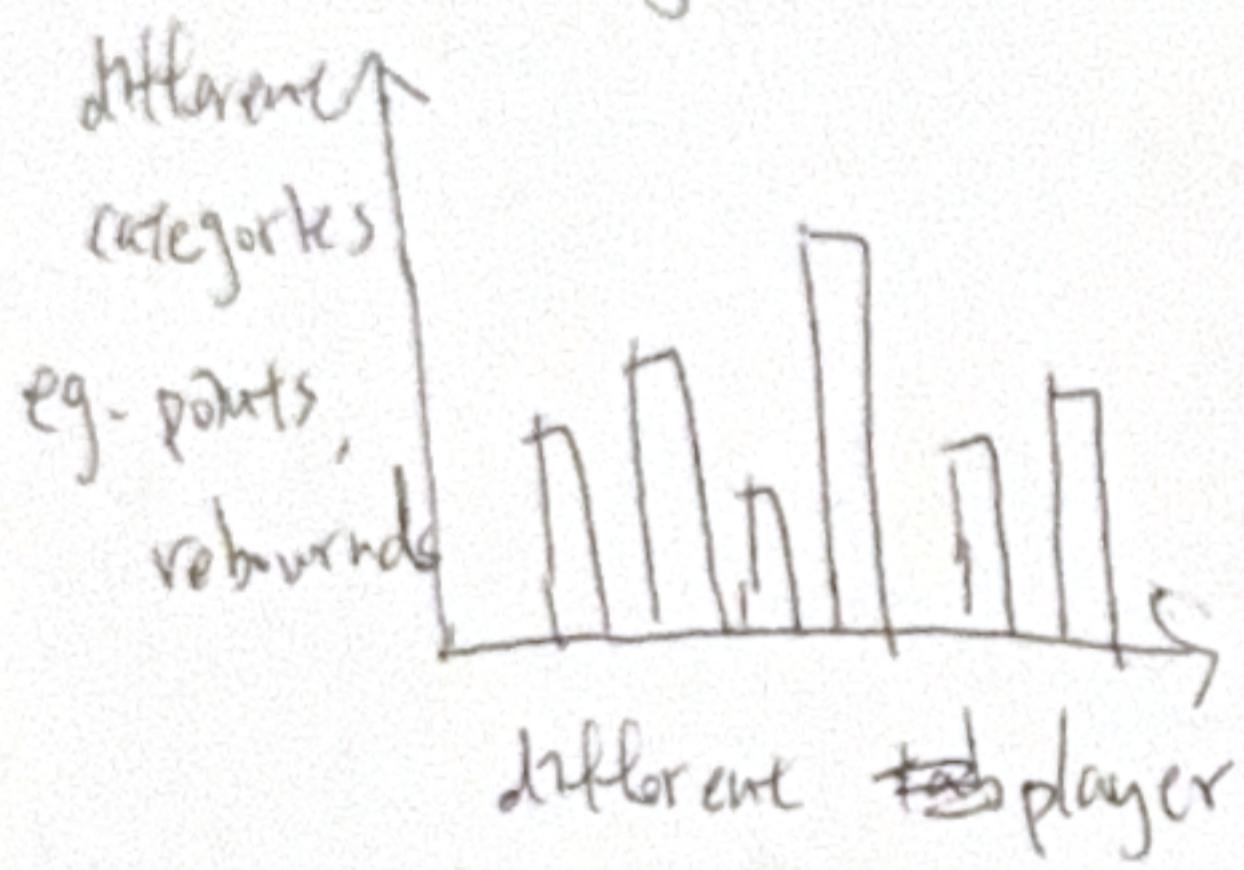

② Shot scatter plot

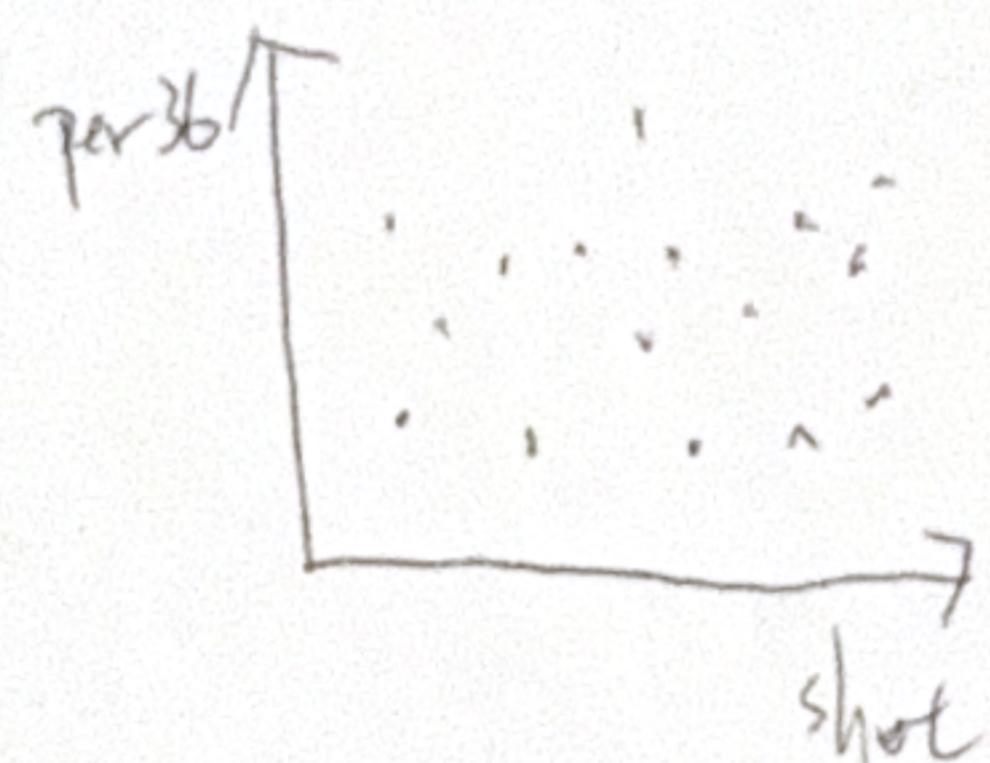

③ Player ~~per state~~
heat map

④ Ranking table

⑤ Efficiency scatter plot

⑥ Points per states

Filter

- * Remove duplicate categories
- * Combine similar categories
- * Player heat map would be hard to implement

Categorize

- * Ranking (Points, Rebounds, 3pt...)
- * Visualize efficiency
- * Map

Refine

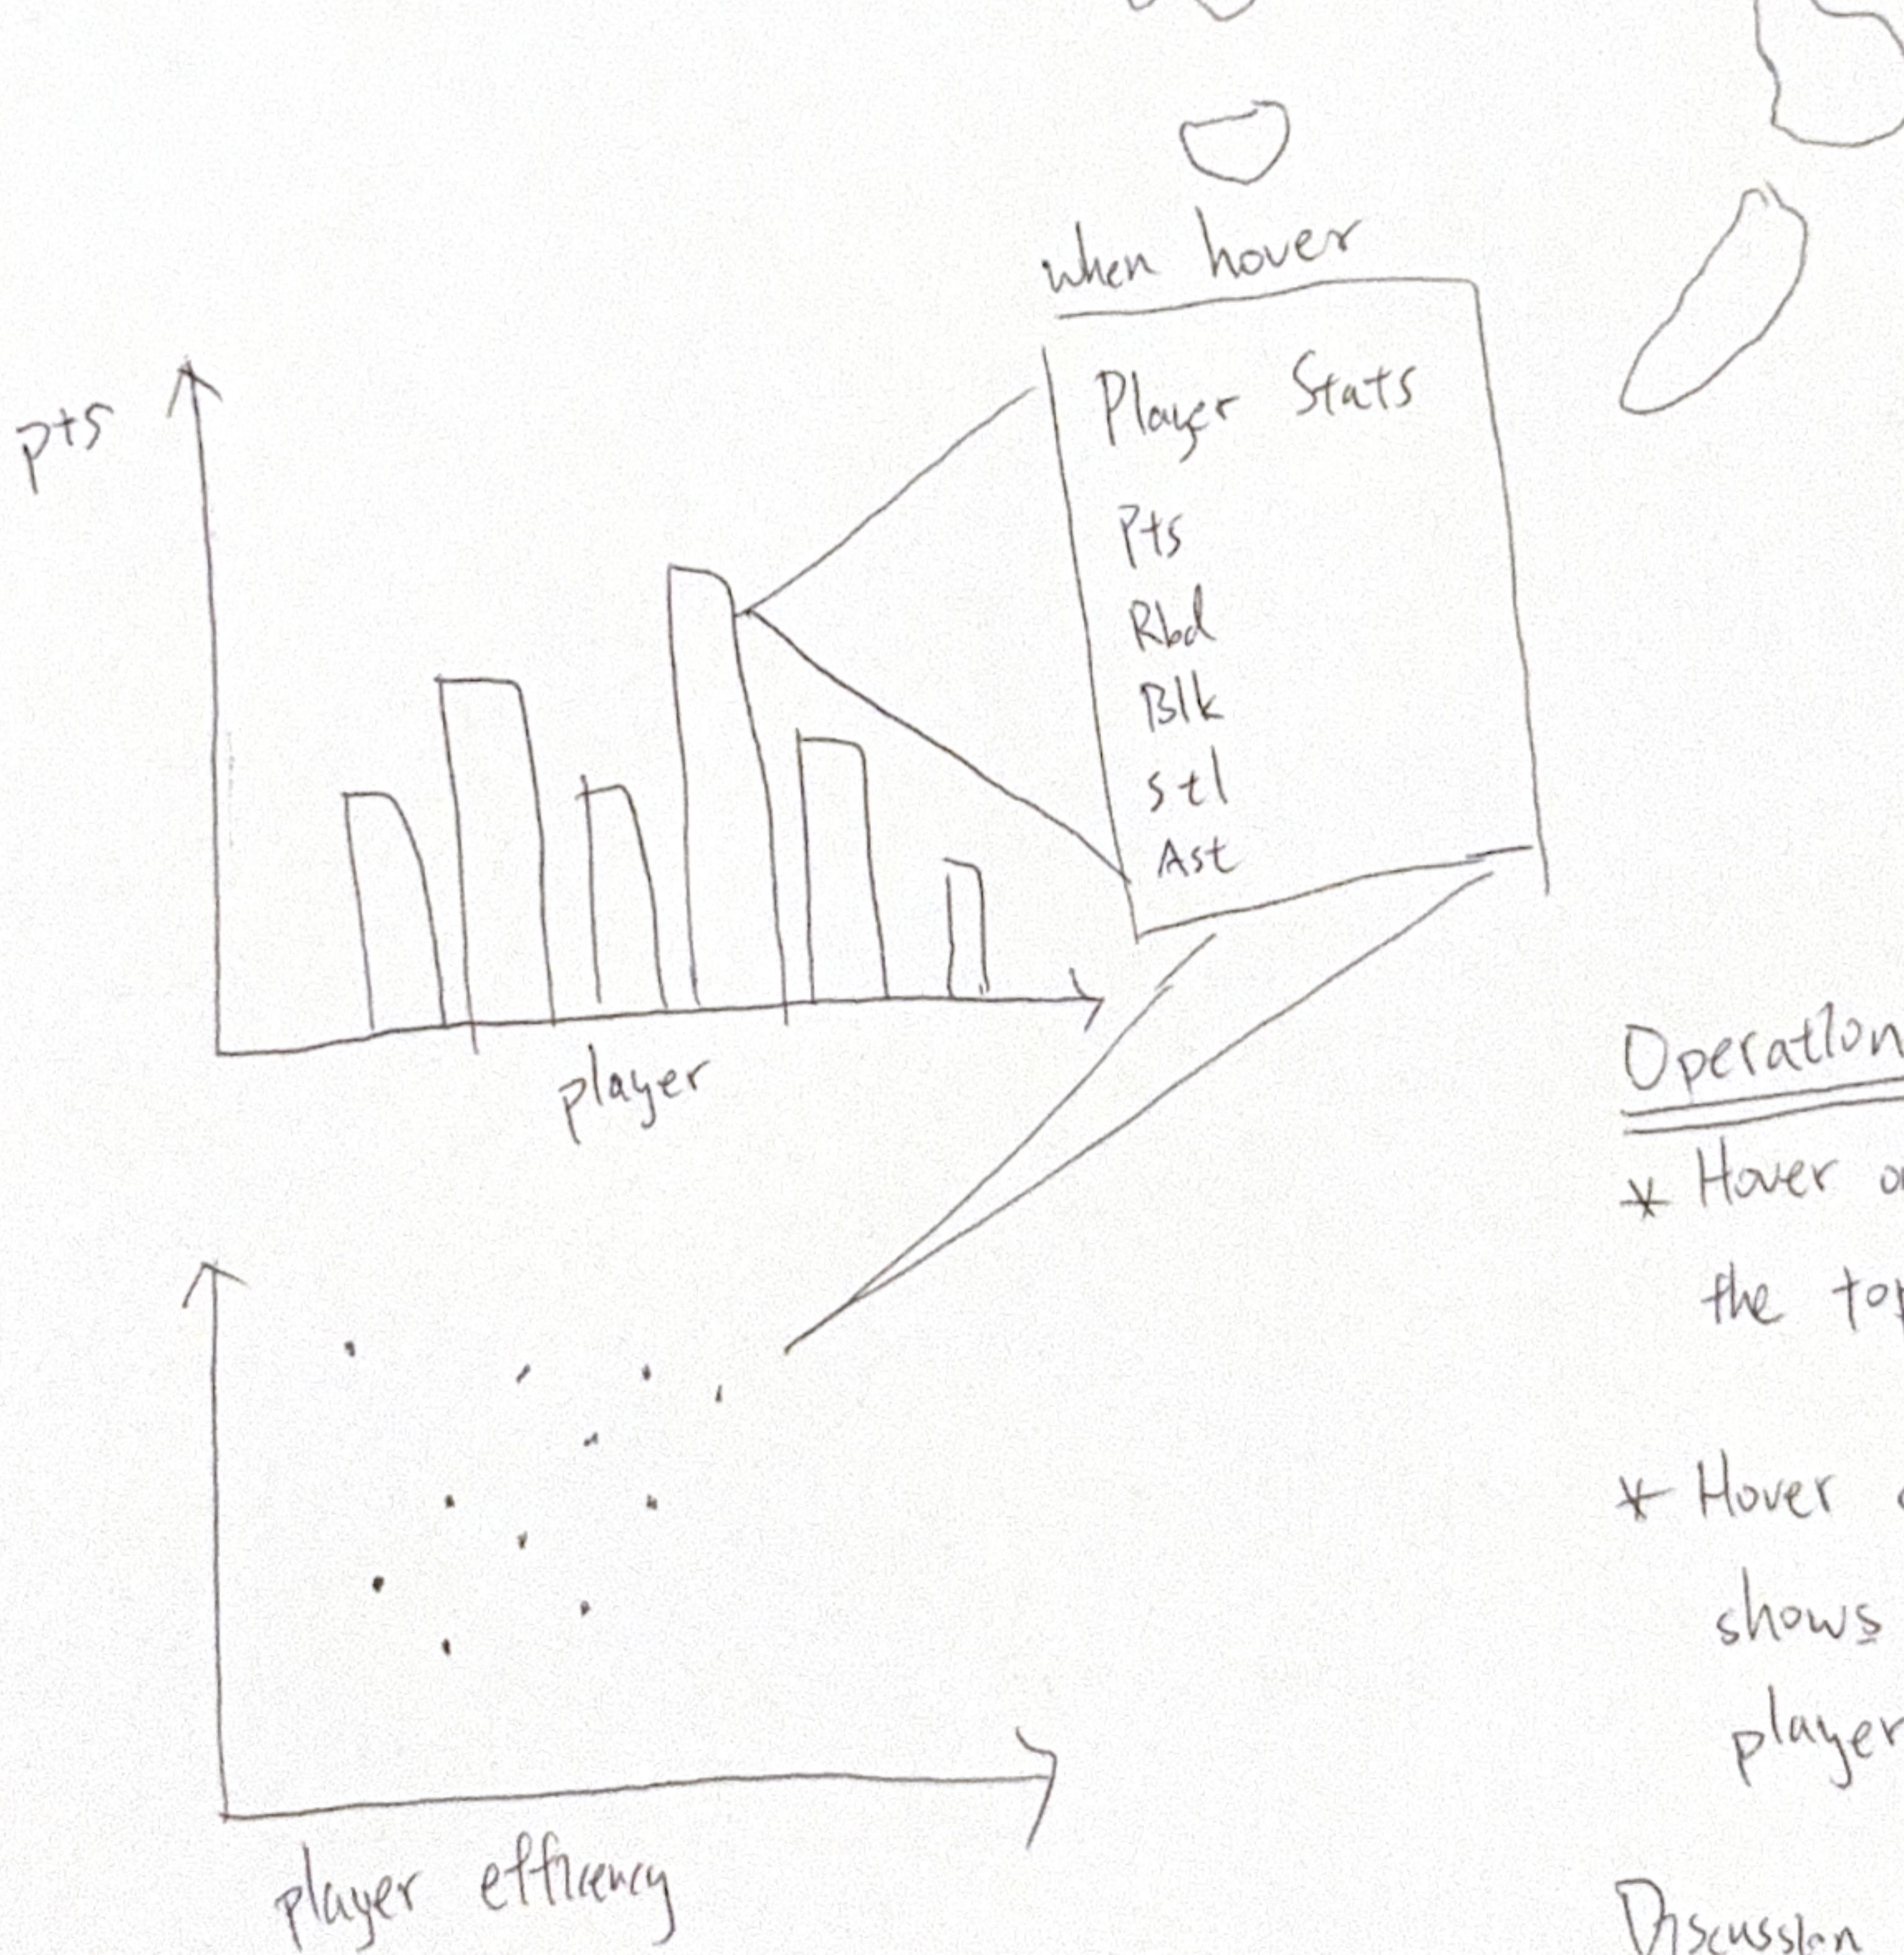

- * Combine multiple ranking into one table
- * Combine efficiency scatter plot into one icon

Question

- * Can the map show the stats clearly?
- * Will the ranking table be messy?

sheet 2

Layout & Focus

Operations

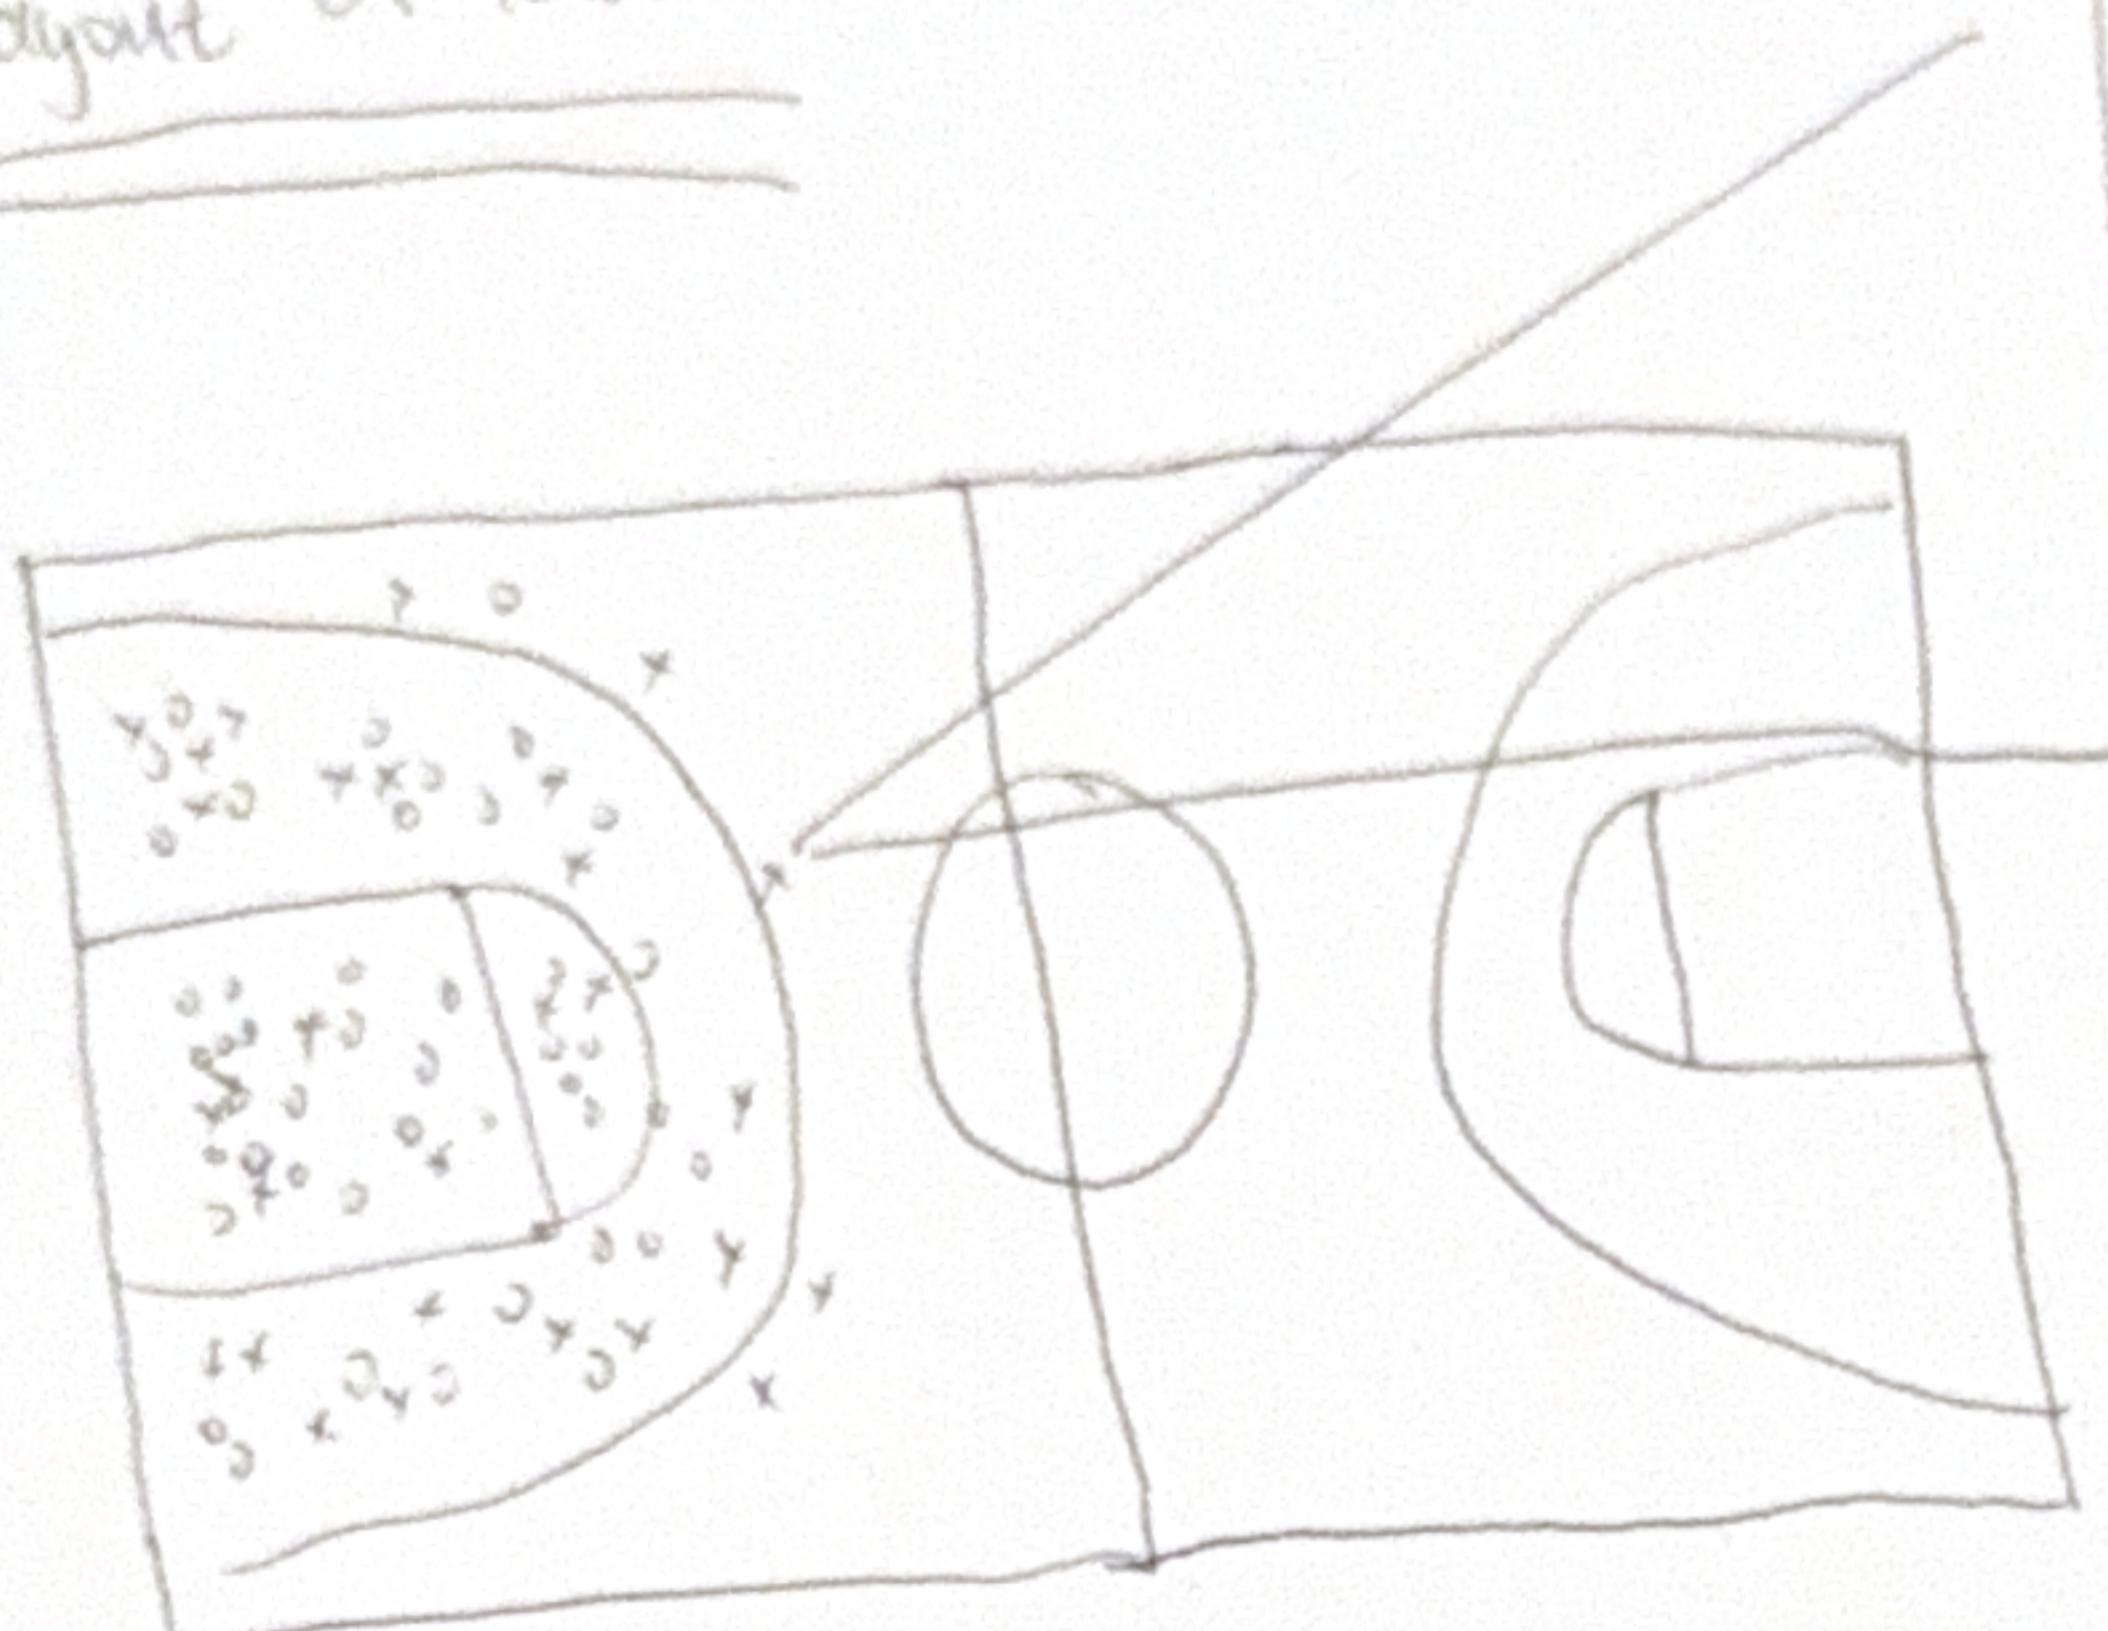

* Hover on the map will show the top player in the states

* Hover on the bar or dot shows the stats of specific player

Discussion

* Have to select different categories to see different stats

* Combine stats idiom reduces duplicate content

Layout & Focus

Name	PTS	Rbd	...

Operation

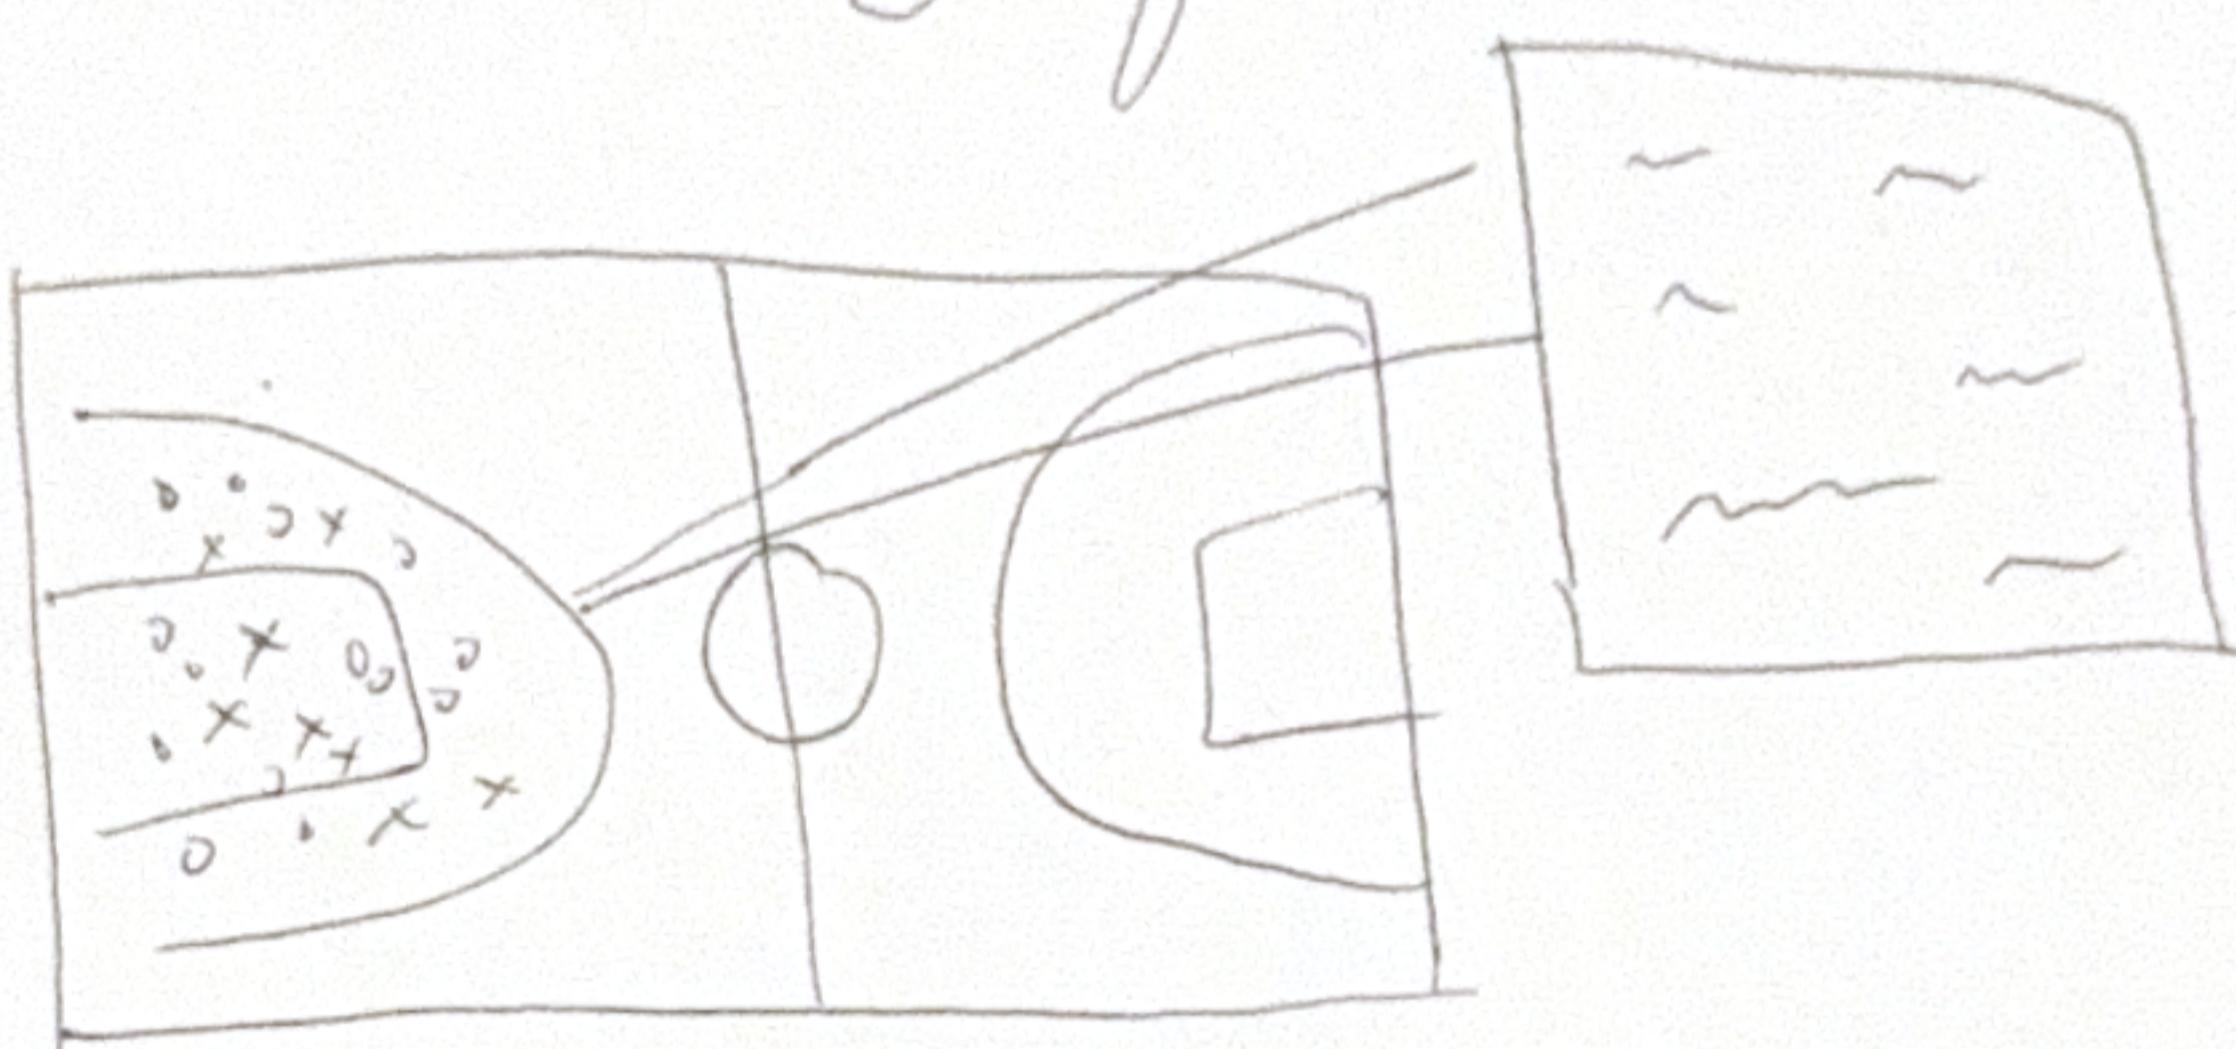

- * Hover on the shot shows the shot's stats
- * User can select and filter and order the table

Discussion

- * The shot chart shows the heat map and shots clearly.
- * The table combine all data into it
- * The data in the table needs more visualization

Sheet 4

Layout & Focus

name	pts	...

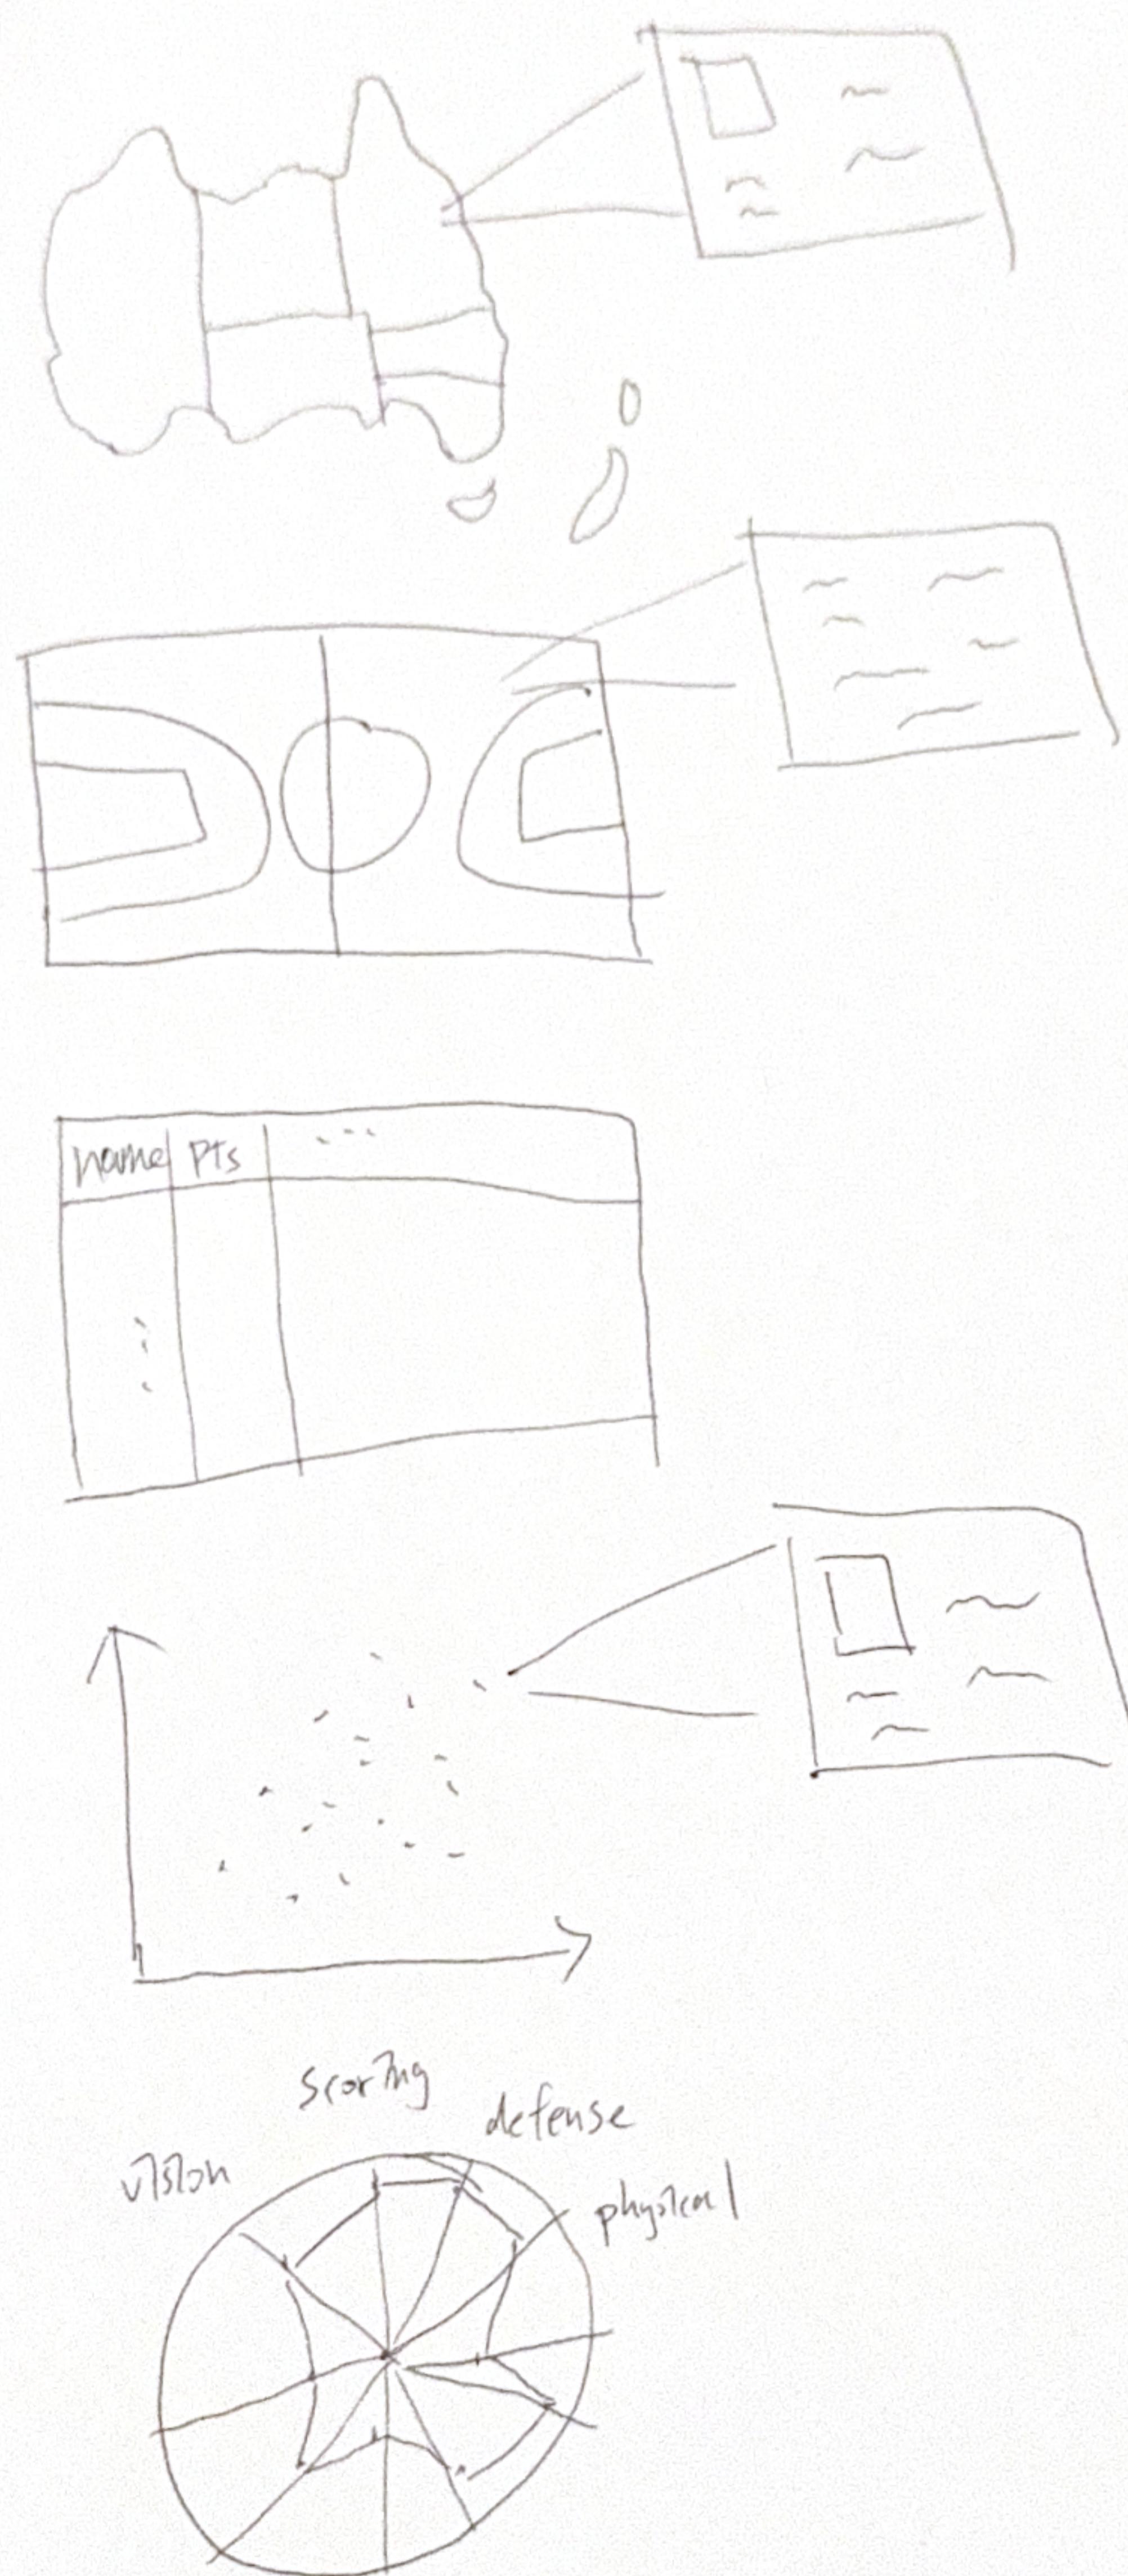

Operation

- * Hover on the map or chart shows the detail
- * Select player will change the look of other icons.

Discussion

- * Combine similar data into one icon.
- * Lack of visualization of ~~comparison~~ of single player's ability.

Layout & FocusOperation

- * Hover on the icons show corresponding details.
- * Select specific player shows its detail in the radar chart.
- * Select player or attribute in a icon will also change the look of other icons.

Discussion

- * No duplicate or redundant item, every icon shows different views.
- * Comparison between players and also individual ability.
- * Shot chart shows the heat map and shooting style of a player.
